

Dynamic Biosensors GmbH announce successful completion of a financing round with a consortium of prominent investors

Munich / Landshut / Garching / Martinsried, February 14, 2013

Along with EXTOREL, the participating investors include Bayern Kapital, UnternehmerTUM Fund and Bio^M. Dynamic Biosensors GmbH is a pioneer in analyzing molecular interactions. The company will use the funds to complete the development of their first commercial measurement products and to enhance marketing operations.

Dynamic Biosensors GmbH, Munich/Germany, has developed a patented switchSENSE technology, an innovative biochip platform for the analysis of molecular interactions. Compared to current commercial systems, switchSENSE offers hitherto unobtainable measurement data and outstanding sensitivity, reducing time and cost of these measurements, and improving the quality of the measurement results at the same time. All major biopharmaceutical companies and academic institutions are customers of these systems.

"Three years ago, we learned to know Dynamic Biosensors as a German-Japanese research project. We are excited about the unrivaled performance of their technology and the related lucrative business opportunities." says Timo Komulainen, Managing Partner of UnternehmerTUM Fund. Dr. Ulrich Rant, CEO of Dynamic Biosensors, adds "The investment enables us to complete the development of our first commercial products and to bring them promptly to the market. Additionally, we will benefit from the impressive know-how and the long-term business experience of our new partners. "

Dynamic Biosensors

Dr. Frank Fischer, Wolfgang Kaiser, Dr. Ulrich Rant, Dr. Dirk Scholl and Dr. Ralf Strasser founded Dynamic Biosensors in 2012 as a spin-off of the Technische Universität München and Fujitsu Ltd. The development of the switchSENSE technology has been partially funded by a GO-Bio project grant from the German Federal Ministry of Education and Research (BMBF).

EXTOREL GmbH

Characterized by independence, professionalism and a comprehensive range of services, EXTOREL provides integrated advice on all investment decisions. One of the focal areas of investment is private equity and venture capital. As an entrepreneurially-minded, active investor, EXTOREL invests in young, innovative technology businesses with strong growth potential. Its investments in more than 100 companies cover, among others, the electronics, laser and semiconductor sectors, information and web technology as well as new media and the CleanTech field. The companies in the portfolio are characterized by exceptionally committed and dynamic management teams generating innovative ideas and products.

Bayern Kapital GmbH

Bayern Kapital was set up in 1995 as an initiative of the Bavarian state government, aimed in particular at providing venture capital to young, innovative Bavarian companies. To date, Bayern Kapital has invested about € 180 million in 220 innovative high-tech companies. Bayern Kapital manages currently an overall fund volume of about € 200 million.

Bio^M AG

Bio^M AG Munich Biotech Development is a consultancy and shareholding enterprise in Martinsried, at the hub of the Munich biotech region. Bio^M AG supports young and promising biotechnology companies with a seed financing program aimed specifically at enterprises in the founding or start-up phase and with a focus on state-of-the-art drug development technologies. Bio^M AG also offers consultancy services for founders and young entrepreneurs in the region. Services include the competent assessment of business ideas

and advice on strategic and operative business models, as well as the provision of risk capital.

UnternehmerTUM-Fonds Management GmbH

UnternehmerTUM Fund provides venture capital for young high technology companies in the industry sectors Information and Communication Technologies (ICT), Medical Engineering and CleanTech. UnternehmerTUM Fund offers to the portfolio companies a wealth of experience in strategic and operative business development and a unique network encompassing industry partners and other venture capital investors.

EIF, ERP und CIP

UnternehmerTUM Fund is partially funded by the European Investment Fund (EIF), by the European Union, through the Competitiveness and Innovation Framework Programme (CIP), as well as by the ERP-EIF Dachfonds and the LfA-EIF Dachfonds.
